Subject: Re: Asking for permission to request students to participate a survey.

Hi All

I don't think it really makes sense to ask the current cohort of students (and may confuse them?), as they don't have the necessary experience to reflect on the experience. Asking the current cohort seems like it would lead to students speculating without having the necessary experience to make reasonable reflections/suggestions.

I agree with Shanika's point that it would make more sense to survey the students your subject who completed SWEN20003 before.

If you provide a URL for the survey I can post an announcement in the previous semester's Canvas and ED Discussion sites as well.
Please let me know.

Regards,
Andrew

Hi,

Sorry, I was not able to give you access to the lecture today.

I have cc'd Andrew, who will be doing the Wednesday lecture in case you still want to survey the current students - [@Andrew Valentine](#) this is a student from the IT project subject I mentioned I am a client for.

[@Cheolgyun Park](#) the outcome of the project is not for this cohort of students, and I believe asking this is less useful because they are just starting the subject and they would have no idea what could be done better.

If you want to really do a survey, it will be more useful to do the survey for the students in your IT Project subject, who have already done SWEN20003. Does that makes sense?

Regards,

Shanika

Subject: Asking for permission to request students to participate a survey.

Dear Professor,

Our IT Projects team has prepared a short survey to understand which project ideas would make students more interested and engaged in the subject.

We believe the most effective way to address your concerns about student engagement, while ensuring students are happy with the final product is to directly ask for their opinions and ideas.

Would it be possible for us to take the first two minutes of today's lecture to present the survey and share the QR code with the students?

Thank you for considering our request.

Kind Regards,
Cheolgyun Park
Team 56
